Core Purpose Statement:

We are integral to our customers in promoting the highest level of health, safety and environmental performance. Our team members create value by always encouraging and coaching safe behaviors. We are recognized for our expertise in observing, collecting and analyzing data, assessing gaps and creating action plans to address those gaps. Our clients seek us out as a resource in developing solutions that drive an accident and injury free workplace.

Your business and people's lives depends on superior safety standards. Our knowledge and experience will reassure you, and our level of professionalism will impress you.

ISS provides the following:

On-Site Personnel

- Safety Coordinators
- HSE Consultants
- Competency Coaches
- H2S Technicians & Equipment

Services

- Consulting Services
- Training & Education

We Recruit, Train and Retain the Best

- Competency-rich candidate pools identified and recruited within
- Competency assessment utilized to validate candidates
- Career Field placement based upon needs and competencies

The Tool We Use

We use the Hogan Assessment to enhance our employee selection. The assessment identifies the unique motivators that our management uses to maximize our employee's effectiveness and serves as a guide for training or coaching areas.

www.ind-ss.com

Our In-House Training provides:

- **Early detection of strengths/ weaknesses**
- **One-on-one coaching opportunities**
- **Integration of Operator requirements**

Education & Career Progression

At ISS, we believe that providing highly qualified personnel to our customers is of the utmost importance. We regularly engage our customers for feedback on their level of satisfaction with ISS management, personnel and deliverables.

OQSG provides full experience computer-based training and assessments to employees through the utilization of our flagship software, OQVerify™. The courses in our library are user-friendly and they approach operator qualification by appealing to a variety of learning styles.

All of our 75 courses are available online; this availability gives users easy access to the most up-to-date content with no work for you, the operator or contractor. Records are synchronized 3 times a day with ISNetworld and other major record storage providers.

Why OQSG?

- Accepted by over 75 operating companies
- Most comprehensive library of courses
- User-friendly online software
- Quick and easy sign-up
- Flexible pricing: pay-per-use or licensing
- Knowledgeable and friendly customer service

“We use OQSG training modules and like their content, but I am even more impressed with their level of customer service and commitment to meeting our needs.”

Craig Watson
Colonial Pipeline Company

PINION
courseware

Pinion Courseware is an intuitive, comprehensive LMS that allows you to customize curriculum to meet your needs and store data in one place.

Developed by OQSG, a proven leader in Operator Qualification systems, Pinion Courseware is the next generation of LMS. We can integrate regulatory and compliance requirements and training for any industry.

This makes us the last LMS provider your company will ever need.

Pinion Courseware Features:

- Custom curriculum development
- Comprehensive audit trail
- Automated assignment functions based on your requirements
- Notifications
- Multimedia course content delivery
- Customized Assessments
- Comprehensive library of courses
- Integrated offline system for areas without internet access
